Carbendazim TC

Part I: General Information

● Product identification

- Common name: Carbendazim
- CAS number: 10605-21-7
- Structure

● Crop Uses Summary

Carbendazim is a widely used broad-spectrum benzimidazole fungicide. It controls a wide range of fungal pathogens on cereals, fruits, cotton, tobacco, turf, ornamentals and vegetables. Used at soil treatment and foliage application on appearance of disease. Absorbed by roots and has some foliar penetration. Soluble acid salts give some control of Dutch elm disease when injected into the bark. Used as a seed dressing or as a post-harvest dip. In many countries its use is restricted to certain specific uses with strict limitations.

Part II: Recommended Registered Companies

1. Zhejiang Wynca Chemical Group Co., Ltd

1.1 Basic registered information

Registered No.	PD20080636	Name	Carbendazim
Manufacturer	Ningxia Sanxi Chemical Co., Ltd	Toxity	Low
Active ingredient	Carbendazim 98%		
Valid date	2008.05.13-2013.05.13	Formulation	TC
Registered crop	Target	Dosage	Usage

Registered No.	PD84117	Name	Carbendazim
Manufacturer	Ningxia Sanxi Chemical Co., Ltd	Toxity	Low
Active ingredient	Carbendazim 98%		
Valid date	2009.12.16- 2014.12.16	Formulation	TC
Registered crop	Target	Dosage	Usage

1.2 Business highlight

- **Background:** Zhejiang Wynca Chemical Industry Group Co., Ltd. established in 1965 and located in the economically advanced city, Hangzhou, in Yangtze River Delta. It has listed in Shanghai Stock Exchange in September; 2001 and becomes the top 500 manufacturing enterprises in China and the global top 20 enterprises in the field of agricultural chemistry. Through the strategy of collectivization, globalization and branding, Wynca builds a worldwide sales network and satisfies the people's demands from production and life with good products and services.
- **Business & Products:** The major business types of Wynca is pesticide and Si-based new materials. In the product families of Wynca, glyphosate plays a leading role while many raw material and preparations are researched simultaneously. Based on the compound of organic silicon singles, a complete organic Si industry chain has been formed which starts from raw material to the final products. The two major series of products have been widely applied into the field of agriculture, Aeronautics and Astronautics, health care and medication, building materials, electronic and electric industry, and new energy development. The products receive a warm welcome in the markets of countries and areas worldwide.
- **Technical support:** With supports from the technological center recognized by the State and a post-doctor research center, Wynca is a national key hi-tech enterprise, national experimental enterprise for innovation development and a national patent experimental enterprise. Wynca has developed a complete set of technique innovation system, and obtained a series of patents and special technologies based on the technology advancement.

1.3 Product analysis

- Wynca is one of the biggest 3 on Carbendazim. After the acquisition of Ningxia Sanxi Chemical Co., Ltd, their annual productivity can reach 10, 000 tons.
- Wynca's main oversea market of Carbendazim is South America where they cooperate with many local importers.

1.4 Company events

- Wynca , as a listed company, has realized the saleroom of 3.61 billion RMB relying on the

statistics from Jan. to Sept. 2011

- Wynca has made the acquisition of Ningxia Sanxi Chemical Co., Ltd in Sept. 2011
- [Wynca's glyphosate product gained ICAMA registration in July 2011](#)

1.5 Contact information

Name	Zhejiang Wynca Chemical Group Co., Ltd.
Address	No.555,Xinan East Road,Xinanjiang, Jiande City,Zhejiang,China
Tel	0571-87217944
Fax	057187220464
Website	www.wynca.com
Contact	Ms. Zhang Lan Trading Manager
Email	karon_zhang@wynca.com

2. Jiangsu Lanfeng Biochemical Co., Ltd

2.1 Basic registered information

Registered No.	PD20096852	Name	Carbendazim
Manufacturer	Jiangsu Lanfeng Biochemical	Toxity	Low
Active ingredient	Carbendazim 95%		
Valid date	2009.9.21-2014.9.21	Formulation	TC
Registered crop	Target	Dosage	Usage

2.2 Business highlight

- **Background:** LANFENG BIO-CHEM is a large-scale agrochemical enterprise who was reformed from Jiangsu Suzhou Chemical Group Xinyi Agrochemical Co., Ltd.
- **Product range:** Company products range includes fungicides, insecticides, herbicides and intermediates related to phosgene. It is very popular in domestic and international market for our products: Carbendazim, Thiophanate Methyl, Benomyl, Propamocarb, Hexazinone, Iprodione, Metazachlor and Intermediates etc. LANFENG BIO-CHEM is the No.1 production base of Thiophanate Methyl Technical in China.

2.3 Product analysis

- Lanfeng is one of the biggest 3 on Carbendazim. Their annual productivity can reach 12,000 tons or so. In 2011, the productivity is expected to reach 15000 tons.

- Lanfeng's main oversea market of Carbendazim lies in South America.

2.4 Company events

- Lanfeng, as a listed company, has realized the saleroom of 0.60 billion RMB relying on the half-year statistics report 2011
- [China Energy Recovery Inc. \(CGYV.PK\) lands \\$5 Million contract from Lanfeng Biochemical Co. Ltd](#)
- [Liang Huazhong, President of Lanfeng Biochemical received Agropages' exclusive interview](#)

2.5 Contact information

Name	Jiangsu Lanfeng Biochemical Co.,Ltd
Address	JiangSu Province Xinyi Xin'anlu NO.120 China
Tel	0516-88983751
Fax	0516-88921021
Website	www.jslanfeng.com
Contact	Mr. Ma Dewen Trading Manager
Email	lfmdw@jslanfeng.com

3. Anhui Guangxin Agrochemical Group Co.,Ltd

3.1 Basic registered information

Registered No.	PD20060029	Name	Carbendazim
Manufacturer	Anhui Guangxin Agrochemical	Toxity	Low
Active ingredient	Carbendazim 98%		
Valid date	2011.01.25-2016.01.25	Formulation	TC
Registered crop	Target	Dosage	Usage

Registered No.	PD20093657	Name	Carbendazim
Manufacturer	Anhui Guangxin Agrochemical (Tongling)	Toxity	Low
Active ingredient	Carbendazim 98%		
Valid date	2009.03.25- 2014.03.25	Formulation	TC
Registered crop	Target	Dosage	Usage

3.2 Business highlight

- **Plants:** Anhui Guangxin Agrochemical Co., Ltd now owns three major manufacturing plants which are set in Guangde Country and the Tongling Recycling Economic Garden of Anhui Province.
- **Main products:** Tens of technical materials and new formulations of fungicide, herbicide and insecticide. The high-efficiency and low-toxicity CARBENDAZIM and its by-products boast the top quality in the agrochemical industry, and its production capacity ranks the No. 1 in the world. The high-grade CARBENDAZIM products have got technological certificates and been proved to meet the advanced international standards. Its other main products: Thiophanate methyl, Diuron, Glyphosate, Chlorpyrifos, and Isoproturon.
- **Certificates:** ISO9001 and ISO14001 certification.
- **Dominant Market:** Europe, America, Southeast Asia and other countries and regions.

3.3 Product analysis

- Annual productivity: 20,000 tons
- Main markets of Carbendazim: South and North America, Southeast Asia, Latin America

3.4 Company events

- Anhui Guangxin Agrochemical Co., Ltd has proposed listing applying to Securities and Futures Commission (SFC) for auditing.

3.5 Contact information

Name	Anhui Guangxin Agrochemical Group Co.,Ltd.
Address	1312# Room, Yu'an Plaza, No. 738, Orient Road, Shanghai
Tel	021-50817215
Fax	021-50817212
